

YOUR PATHWAY YOUR FUTURE

TYSON FETTIG

Dual Credit Testimonial: Welding

I've taken dual credit courses for the past 3 years, and this year, I'm doing the pre-employment welding program. When I first enrolled, I was interested in welding. It confirmed my direction because I really liked how they ran it, and I just like welding. It will impact my future a lot because I'll be able to have my first year of welding out of high school. I'm getting 25 credits for high school graduation because of these courses. If other students asked about my experience, I'd tell them to join so they can learn about the trades and see what trade they want to do. It is important to continue to offer it because then future high school kids can come and learn about the trades and see what trade they are interested in.

Through my dual credit courses, I've gained hands-on experience and valuable knowledge that has set me up for success. The pre-employment welding program has been a game-changer for me, giving me a head start in a career I'm passionate about. Beyond the skills, I've also learned discipline and the importance of setting goals for the future. These programs don't just teach you a trade—they open doors and give you the chance to figure out what path excites you. I think it's amazing that high school students can explore real-world careers early, and I hope these opportunities keep growing for others like me.

Dual Credit Pathway:

1131 Introduction to Trades - Winter 2023

1134 Introduction to Construction Trades - Winter 2024

Pre-Employment WELDING - Fall 2024
